

Galaxy (Dance 01)

We're like Venus with the heat so bright
Don't want no penis, oh no not tonight
We just want to dance we've got to soar
So we're gonna orbit you on the dance floor

(Chorus)

We're the galaxy girls
Yeah, we're outta sight,
We're like a red moon
In your planetary flight.
We're like the Big Bang
Creating all new worlds
We're hotter than the sun
We are the galaxy girls

We're like Jupiter, we're outta this world,
We're the constellations, get your head all twirled.
We're the supernova, got you burnin' hot,
We're the space queens, in the cosmic spot!

(Chorus)

We're the galaxy girls
Like a black hole we will suck you in
We're like a nebula
Take you to the Milky Way and back again
We're like an asteroid
Crashing through the worlds
We're made of stardust
We are the galaxy girls
